Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 03 November 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Lines 8-10 of the claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants' limitation of the fueling apparatus being constructed and arranged to create turbulence without mechanical assistance is deemed to be unclear, considering the fueling apparatus is composed of mechanical parts. Furthermore, all limitations of the claim should be positively defined.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by Büchel (USPN 6,425,354).

In reference to claim 28, Büchel discloses a gas combustion-powered apparatus, comprising: a combustion chamber (2), the combustion chamber (1, 2) including a first wall (14) and a second wall (18) moveable with respect to the first wall (14) between a first, collapsed position (figure 5) and a second, expanded position (figure 4) defining a volume between the first (14) and second (18)

Art Unit: 3721

walls; an ignition source (53) in operable relationship to the combustion chamber (1, 2) for causing an ignition of a combustible gas within the volume; and a fueling apparatus (41, 42) constructed and arranged for injecting a pressurized fuel into the volume.

Allowable Subject Matter

5. Claims 1-27 are allowed.
6. The following is an examiner's statement of reasons for allowance: The art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious a combustion tool having a combustion chamber including a cup-shaped wall assembly parallel to a flat wall assembly, wherein the cup-shaped wall assembly is movable in relation to a piston chamber. Examiner has interpreted the term "cup-shaped" to be defined as a structure having a bottom wall attached to a perpendicular wall or a structure having a concave surface. The prior art of record is found to disclose combustion tools having multiple wall assembly movable relative to a piston chamber, but none that disclose a cup-shaped or concave wall assembly movable relative to a piston chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations of the claimed invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gloria R Weeks whose telephone number is (703) 605-4211. The examiner can normally be reached on 7:30 am - 6:00 pm Monday-Thursday.
